

The **Uganda Learning, Evidence, Accountability and Research Network (U-Learn)** is supporting the Ministry of Health to update and expand the Covid-19 information portal to provide a more detailed and robust range of data, analytics and resources. The MoH Covid-19 Response Information Hub (RI Hub) was built on the existing GoU/MoH site (<https://covid19.gou.go.ug/>) to provide easy response-wide engagement, as well as accessible information for the general public. The platform facilitates coordinated action and provides a single entry-point for the Covid-19 response in Uganda.

HOME | ABOUT THE RESPONSE ▾ | STATISTICS | RESOURCES ▾ | RESPONSE ACTORS ▾ | PILLAR DASHBOARDS

Key features include:

1 Dedicated response pillar pages

Accessible from the 'Uganda response to Covid-19' page under the 'about the response' section in the navigation. Each page gives an overview of the pillar, of the pillar chairs and sub-committees and provides easy access to pillar resources.

2 Statistics page

Presents key data, maps and graphs for the Uganda response. Shows data on gender and age; local vs. imported transmission; district and hospital level data (on the maps); new and cumulative cases, deaths and recoveries; testing; admissions; exits; and more.

3 Document repository

Accessible from the 'resources' section in the navigation. Built in filters allow for quick and easy filtering of resources per pillar, sector, author etc. Different formats, such as excel, pdf, videos, and audio are included. Recommended resources are shown on the main page.

4 Covid-19 response partner activity mapping

The dashboard is accessible under the 'response actors section'; it provides 4Ws information (who, what, where, when) on actor presence and programmatic focus to support enhanced coordination under each pillar.

5 Restricted access area

The restricted access area requires user login to see resources that are more sensitive in nature. Access can be obtained by sending an e-mail through the contact form (in the footer of the landing page).

6 Hosting partner products

Any other relevant resources can be hosted on the RI Hub, both in the public and private access areas.

Currently, 3 Dalberg Data Insights/Unicef maps are hosted in the private access area: Points of Entry map, Vulnerability map, and the Continuity of Care map.

Help us populate the RI Hub!

Please do send any relevant resources through the RI Hub contact form (in the footer of the landing page) or using the e-mail address below (please upload the resource at once)!
